DIAMOND MOUNTAIN RA 3809 FIELD INSPECTION FORM

DATE: 3/9/94 TIME: 1345 LOCATION: T.3S, R.21E, Sec.29, Subdivision NWNW SLB&M

OPERATORS PRESENT DURING INSPECTION: N/A
(Names and Titles)

SERIAL NO. OF NOTICE/PLAN ON FILE: U-66366 IS THE OPERATION ACTIVE? No

DESCRIPTION OF OPERATIONS (including access, reclamation, etc.):

This site was inspected by D.J. Beaupeurt-Schantz, accompanied by BLM Ranger Wayne Stevens and Uintah County Deputy "Lewis". No activity was noted at the site, which appears to be in the same condition as it was during the 04/03/92 inspection. The wire "fence" which was strung around the area by Pete Sokolosky (BLM geologist) and D.J. was still standing enough to keep deer and other animals out of the shaft area, as evidenced by footprints at the fence. The shaft itself is still open. The pile of wood to the west of the shaft site is still intact. Dirt piles are still in the same location as they were in past inspections.

Mr. Stevens has stated he is having trouble locating dynamite to finish expanding the shaft area by approximately 3 feet wider and 3 feet deeper. No dynamite or storage areas were noted during this inspection. There were no signs of vehicles, etc., having been in the area.

IS THE OPERATION IN COMPLIANCE WITH THE NOTICE ON FILE AND/OR THE STIPULATIONS OF THE APPROVED PLAN? Yes (If NO describe deficiencies):

Although no improvements have been made to the fence around the open shaft, it appears to be adequate at this time. No erosion was noted. No explosives were noted.

	Signature	Print Name/Title	Date
Inspector		D.J. Beaupeurt-Schantz, Phys Sci Tech	03/10/94
Management		Ron Trogstad, Area Manager, DMRA	03/10/94

Attachments: Two photos were taken of the area. These will be attached as soon as they are developed.
